## RED CROSS NOTES

RAISE \$70,635 TO DATE  
FOR RED CROSS WORK HERE

Figures compiled up to the time of going to press this week, indicate that the efforts of local Red Cross Canvassers in the town and district have been most successful. A statement submitted for publication by the branch secretary, shows a total of \$70,635 on hand. Of this, \$34,94 has been received in the form of memorials to the branch; giving an enrollment of 354 persons.

The statement in detail reads as follows:

On Hand at Start

	Books	Items	Members
of Camp	\$128.65	\$68.00	\$248.65
Town Canvas	98.35	179.00	278.35
Tot. for town	326.00	235.00	561.00
Campaign in district	327.60		
Gem	22.75	60.00	82.75
Rosemary	1.50	6.00	6.50
Lathom	27.00	30.00	57.00
Crowfoot	5.00		
Makapee	14.00	14.00	
Total	348.85	354.00	702.85
Pledged Monthly			325.85
From local			312.00
3 Zones still to report for town.			
No report from Countess, and further reports to come from Gem, Rosemary, Crowfoot and Makapee.			

## LOCAL OFFICERS ASSIST WITH ORGANIZATION AT CLUNY

Several officers and members of the local group journeyed to Cluny on Monday evening of this to assist with the organization of a local group at that point.

Following a brief outline of methods of organization, officers for the branch were appointed for the year:

President: Mr. J. Bestie

Vice-President: Mrs. M. Johnson

Sec-Treas.: Mrs. D. Clark

Executive: Mr. Joe Corbeil

Mr. Cooper

Mr. Walter James

Chairman, Soldier's Service Committee: Mr. W. Creighton

Chairman Finance Committee: Mr. Dave Nelson

Chairman Work Committee: Mrs. J.

## E.I.D. NOTES

The Board of Trustees met on Saturday afternoon, November 20th, and have decided that the regular meeting day be the Third Tuesday of each month.

The Board has ruled that barrels and cans which are to pay by payment of water rates, by each grain is good grade and free of weeds. Any one wishing to turn in barley or oats on this account should get in touch with this Inspector in this district.

The Board has agreed that the date on which land principal payments be made in order to can cancellation of interest be extended to the 31st day of December.

## XMAS TEA AND SALE DATE SET FOR DECEMBER 8th.

December 8th is the date of the Xmas Tea, and Sale, sponsored by the local S. & L. Ladies Aid Society.

Again this year, the features of the sale will be a grab bag, and raffle of a Christmas Hamper.

The raffle will probably attract considerable attention, and it will be quite worth purchasing tickets on.

Contents of the hamper will be under the direction of Professor K. W. Neatby.

"For some considerable time past the line elevators have been giving away grain to the public in an effective and constructive manner in which they can assist in agricultural development." The Society intended to undertake such a work was their first consideration and they are now about to accomplish this.

The black and gold team will depend mainly on youth on Sunday, due to the absence of Bill Smith, Lee Melbourne and Vic Pearce from last year.

Tickets on the hamper went on sale the first of this week, and may be obtained through any member of the Society.

The hamper will be on display in the window of the Mezed Beauty Shop next week.

Beetle.

Among those of the local group who attended the meeting in Cluny were Mrs. J. Bestie, Mr. J. Johnson, Pres. Bassano branch; Mr. E. L. Skerl, secretary Bassano branch; Mr. Harper of the Finance Committee, Bassano branch; and Mrs. Garfield.

Professor Neatby spent his early years in Saskatchewan and in 1924 became a member of the faculty of the University of Saskatchewan. He performed graduate work in cereals at the University of Manitoba in 1926-27. From 1927 to 1930 he was a research assistant to Dr. C. E. Hart, of the Dominion Bush Research Laboratory as cereal specialist, and in 1930 he accepted a position in the cereal crop department of the University of Alberta.

## NAMED TO HIGH AGRICULTURAL POST

PROF. K. W. NEATBY.

head of the Field Crops Department at the University of Alberta, has been selected by the Lethbridge Agricultural Experiment Station to be the new Director of the

formed Agricultural Division of the Research Council of Canada.

Today, the Society announced that they have formed an agricultural division of the Research Council of Canada.

The new department will be under the direction of Professor K. W. Neatby.

"For some considerable time past the line elevators have been giving away grain to the public in an effective and constructive manner in which they can assist in agricultural development." The Society intended to undertake such a work was their first consideration and they are now about to accomplish this.

He performed graduate work in cereals at the University of Manitoba in 1926-27. From 1927 to 1930 he was a research assistant to Dr. C. E. Hart, of the Dominion Bush Research Laboratory as cereal specialist, and in 1930 he accepted a position in the cereal crop department of the University of Alberta.

## ROSEMARY NOTES

Mr. and Mrs. Down extricated themselves from Clareholm Thursday and Friday.

Miss Lois Akrami returned home after spending several weeks in the Bassano Hospital.

Mr. and Mrs. Bodmer from Patricia were Rosemary visitors on Thursday.

Mr. Orin Johnson had the misfortune to fall down outside, breaking a small bone in his foot.

The Royal Society put on a very good show at the hall on Saturday night, netting them about \$17.00. Mrs. Bryan gave the quilt that was auctioned off. The local orchestra supplied the music.

Miss Pearl Eastman who underwent an operation for appendicitis recently returned home Monday.

## BORN AT THE HOSPITAL

To Mr. and Mrs. Jacob Dyck of Hasker, a daughter on November 16th.

Mr. and Mrs. L. Armstrong, of Huscar, a daughter on November 25th.

To Mr. and Mrs. A. Mansy, of Rainier, a son on November 29th.

## LATHOM NOTES

The Lathom School children have begun to prepare for their school concert.

Miss Babe McLean was a weekend visitor at the home of Miss Mary Love.

Mr. and Mrs. G. Goudie were Sunday callers at the Goulet home Sunday afternoon.

Miss Margaret Freeman underwent an operation for appendicitis at the Bassano Hospital early this week.

Miss Mary Love and Miss Babe McLean were visitors at the homes of the Mertwells and the Bakers on Sunday.

Mr. L. Osterberg visited at the Salmon home Tuesday.

Mr. S. Goding called at the J. Swanson home Monday afternoon.

## Intermediate Club Organized for Season

To Sponsor Team Again This Season, Appoint Manager and Finance Committee Next Sunday.

The Bassano Barbecue Hockey Club held their re-organization meeting on Sunday last, November 28th, at the school dormitory.

The manager of the Club for the past year was Mr. Tom Down, who will continue in this position, and will be called to the helm at 3 p.m. A report of the financial status of the club revealed a \$50 deficit from last season.

However, the players present were unanimous in voting that the team function well under him.

The black and gold team will depend mainly on youth on Sunday, due to the absence of Bill Smith, Lee Melbourne and Vic Pearce from last year.

Tickets on the hamper went on sale the first of this week, and may be obtained through any member of the Society.

The hamper will be on display in the window of the Mezed Beauty Shop next week.

## Cain, McCune Address Gathering Here Tuesday

A very small attendance is reported at the Social Credit Meeting held in the I.O.O.F. Hall on Tuesday evening last, November 22nd, approximately twenty persons turning out.

Principal speakers at the gathering were W. T. Cain, M.L.A., and I. L. Montgomery. Lunch was contributed. Mrs. L. Clark won the grand prize, a ham, donated by Mr. J. R. Jans, and Mrs. D. Derrick and Mr. Herd Sanders won the first prize at bridge.

The Huscar Ladies Aid will hold a bridge party at the home of Mr. and Mrs. W. A. Clark on Friday, Dec. 1.

Ralph Armstrong was the Christma

as cable date by Mr. and Mrs. McLean for the Christmas party.

A group of ladies from the Huscar

area gathered at the home of Mr. and Mrs. Raymond Hought on Monday evening to welcome home a

newly married couple.

As a result of the new marriage

the couple will be moving to the

area of the town of Coon.

Mr. and Mrs. Raymond Hought

will be moving to the town of Coon.

THURSDAY, NOVEMBER 30th, 1934.

## WAR EFFORTS CRITICISED BY HEPBURN

SINCE THAT DAY in 1934 when he ascended to the Premiership of Ontario, we have heard much that from dynamic little fellow "Mitch" Hepburn. His utterances have varied from the ridiculous to the sublime; he has consistently talked to the Dominion Government like a naughty child saucing its mother. On one matter he has gone so far as to defy the head of the United States Administration in a manner like unto a pouter pigeon challenging an eagle. In short, he has amused us a good deal.

His latest utterances takes to task the Government on its war effort. To put it briefly he says the Canadian fighting machine is compared to others as the straw before the wind, that any effort to create of it a brick wall is extremely inadequate.

To "Mitch" our answer is:—In the balmy days of peace (land depression) when the car seemingly needed no chains, we did not hear your voice raised in strong demand that the military power be strengthened; now that we are in the mud, kindly leave off this useless bellowing of which you are so fond, and let us get on with the job, even though the task be difficult and slow.

The point is this: For over three or four years past the storm clouds could be seen on the horizon, but Canada in its usual constitutional squabbles, and racial bickerings, not to mention the pacifist C.C.F.'ers and the Social Credit crusade could not, or at any rate did not, see fit to build up its military establishment. For twenty odd years the militia and other branches of the military forces have been supported in a manner so pernicious that unless the men who composed them had been of strong and enthusiastic character, those forces would long ago have ceased to exist altogether.

Few of us, if any, have any right now to blame anyone but ourselves if our fighting strength is not what it should be. The time is one which demands action and if necessary, constructive criticism, not empty mouthings and unsound castigations by persons knowing little or nothing of the magnitude of the task which faces us.

## CO-OPERATION ESSENTIAL IN E.D.

THE TUMULT and the shouting has died; the E.D. has been tested and found good, a free electorate has had its say and the district is again gearing to function in an efficient manner. It is our sincere hope that the E.D. shall continue on that path of progress and success which it has trodden since its beginning; that those jealousies, hard feelings, and bickerings which have in the past months held sway shall give way to a spirit of co-operative determination designed to foster the welfare of all.

Needless to say, no organization can function without the determined and co-operative effort of its individual members, in the success of the organization lies the success of all. Let the residents of the district co-operate with the executive and the executive co-operate with the residents, and there can be little doubt that in the long run the hope and aspirations of both will be realized.

## NOTE AND COMMENT

When will Finland stop bullying Russia?

Do you desire to know all about Social Credit? Then by all means attend the next re-organization meeting of that party. If it bears any relation in size to the one held in Bassano on Tuesday night, which incidentally was supervised by "professors" W. E. Cain, and I M McCune, M.L.A.'s, you should get a lot of individual instruction, not to mention attention.

In answer to the question "Who is the greatest living man?" recently put to Freshman at Princeton University, Hitler polled 69 per cent of the votes. "We wonder how Abernart would fare if a similar poll were taken at the University of Alberta."

Lord Beaverbrook asks: "Why this four ounces of bacon and four ounces of butter per week ration scheme in Britain? Is it to provide more jobs for bureaucrats, and impose extra restrictions on the public?" He says Canada is full of butter and bacon. "We think so too."

## ANTI-BRITISH TEXT BOOK

FIVE LEADING citizens of Edmonton have been appointed to check over, delete and revise the much discussed school text book "World of Today". They are to study the book separately, and then come together to assemble recommended alterations. This seems to be as good a method as any, for removing material considered objectionable in the light of the present war.

There has been a tendency in recent years, in Britain no less than in this country, to do a great deal of self-searching in respect to the last war, and the final settlement. This has perhaps resulted in excessive criticism of ourselves and a very lenient, charitable attitude to erstwhile enemies. In a general way, we revelled in the blinding of criticism on our own shortcomings. While we were thus engaged, our old opponents were even busily in building up a concept of national inferiority amongst their young people. It was not part of their code to assume any responsibility for the last war and present build-up. So while our youth was being trained to question and weigh all sides in order that recurrence of war would be averted, the youth of our past and present enemies, was being pressed into one bigoted narrow mould of thought, which had its part in the condition of the world today. If German youths and Russian youths had been exposed as our young people have been exposed to similar self criticism and open mindedness, the present war would not have been possible. It is the closed mind, and the rigidly censored speech which have laid the ground work for the present war.

Now we are engaged in a struggle to prevent the code of the closed mind from dominating our lives. We want our children permanently to enjoy the freedom of open thought and speech. But before there is any hope of such freedom, we must do the job of the moment, which is to win the war. This is not the time to dwell unduly (perhaps unfairly) on possible shortcomings of our own. We have an enemy who is giving full time to that. Our school books of the moment could be wisely employed in presenting actively and constructively, the benefits of a positive democracy. We should at least seek to instil in our schools a very definite love for our country and our way of life. If they are worth fighting for, they are surely worth support of school text books—Vulcan Advocate

## AN OLD CUSTOM

IT IS PECULIAR how all these new-fangled fancy fantastic financial schemes always resort to misrepresentations in an attempt to put their scheme over. And failure is always blamed on the press. Still the old-fashioned business man quietly carries on, building good strong foundations upon which the nation continues to build still stronger superstructures and the much maligned press continues to truthfully tell of the growth of the community and nation in an honest endeavor to keep the people informed as to the progress of the people—Inflatable Province.

## VALUE OF BRITISH NAVY

THE Armaments of the great free people everywhere, which are made up of the common people, are the insurance of mankind against the assassination of their liberties. For many years the British people have been building up a fleet against which tyrants have hurled themselves in vain. No man can say how heavily those islands paid for this insurance. If it did not grind the common people to powder, it seems at times a greater burden than men could bear. They sacrificed their education, their homes, the health of the poor and the comfort of the old people to build up this power for the benefit of themselves and the human race. It is the greatest contribution that has been made to the peace and freedom of the world, and it was done by the men on the street.—Stettler Independent.

## The Poet's Corner

## THE FRIEND WHO JUST STANDS BY

When trouble comes your soul to try  
You love the friend who just "stands by."  
Perhaps there's nothing he can do—  
The thing is strictly up to you;  
For there are troubles all your own,  
And paths the soul must tread alone;  
Times when Love cannot smooth the road  
Nor friendship lift the heavy load;  
But just to know you have a friend  
Who will "stand by" until the end;  
Whose sympathy through all endures,  
Whose warm handclasp is always yours—  
It helps some way to pull you through,  
Although there's nothing he can do.  
And so with fervent heart you cry,  
"God bless the friend who just 'stands by'."

## HOW LONG CAN OUR BODIES LAST

"Every Man Desires to Live Long,  
But No Man Would Be Old."

B. H. W. HARRIS

While we have grown accustomed to regarding "three score ten" as the ideal length of life, and marvel when ever we hear of some one who passes the century mark, it comes to us as a surprise when we read the following:

"Eminent scientists and physicians claim that—  
THE SKIN may last for 900 years.  
THE BONES may endure for 4,000

YEARS.  
THE HEART could go on beating for 300 years.

THE LIVER is good for about 400 years.

THE STOMACH for 1 at least 300 years.

THE KIDNEYS for 200 years or more.

THE LUNGS can last 1,500 years.

While we can not verify the absolute accuracy of this estimate, it certainly does not do the individual participant any harm to know this—We do not live as long as we SHOULD. —Health Service News.

Science Predicts Creation of New Race by 2100 A.D.

"Production of a genetically

mined nation of a superior race of Americans was predicted recently by the American association for the Advancement of Science by Dr. Victor G. Heller, of the Rochester Institute of Technology, who will be 80 years old by 2100 A.D.

The miracle furthermore, will come from food so common and ordinary that the cost of eating may be less than that of the present means.

The first step, he said, in the formation of this nation will go to the nations or people which develop the food needs of its individuals.

The first step is to stamp out the diseases which largely attack man from within.

How to start this has been discussed by Dr. Heller, only in the present generation in these changes which come from fruits of food.

He cited laboratory evidence.

Foremost was the experiment of Sir Robert McCarrison in India, who selected a group of Indian boys from among North India people who are among the best specimens of mankind.

"They eat whole-wheat flour, unleavened bread lightly smeared with fresh butter, sprouted Bengal gram, a legume which is a good source of protein, in large quantities, unbolted whole milk, and a small ration of raw meat and bone which is equivalent to 40 or 50 human years. No rat became ill.

Two thousand other rats, living in the same quarters, were fed on rat chow, which is a high protein diet, and was kept until the rat was equivalent to 40 or 50 human years. No rat became ill.

These foods Sir Robert fed to more than 1,000 rats, and on rat diets, natural growth, although the animal was kept until the rat was equivalent to 40 or 50 human years, No rat became ill.

## HOW LONG?

continued from page 2

ness—Winnipeg Free Press.

Mr. McInnis, in his article, which packs a punch. If the scientific application of diet knowledge is going to make the nation that first adopts it superior in health and leadership, the editor of Health Service News fervently hopes it will be one of the great democratic nations, preferably Alberta, of them.

Aside from the question of national interest, every individual alert to the importance of right eating can immediately begin to reap the benefits of superior health. The far-reaching effects of diet on health, efficiency and happiness simply cannot be over estimated.

Messages from those who are trying to solve life's greatest problem,

the health of mankind, may not make interesting reading for many of us. But when we take note of the congested conditions of our hospitals, and institutions intended to relieve the pain of mankind, and the terrible toll of the annual amount of disease and palliatives used for the same purpose, and that disease and death are still playing tag with the human race, we should at least give ear to those who are trying to lead us into better ways of life and living.

OLD TIMER OF GEM DISTRICT  
A. P. MILLER, PASSES.

Alva Perry Miller, 76, one of the first residents of the Gem District, died in a Calgary Hospital on Monday afternoon of this week, November 27th.

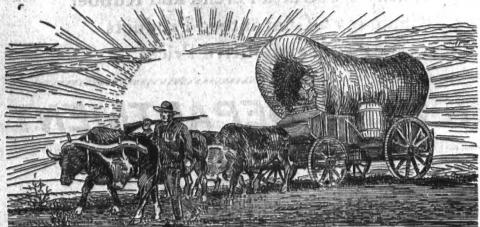

Born at Jerseyville, Ill., he came to Gem 25 years ago and had resided

expectations that over 100 Alberta entries would be sent to the Chicago International Hay and Grain Show was expressed by the agriculturalists over here since.

Surviving the late Mr. Miller are his widow, Emma, two sons, Perry in San Francisco, and William Pollock of Gem; two daughters, Mrs. S. C. Royton of Payette, Idaho, and Mrs. L. E. Radford of Gem; a son, Lester, and N. E. Van Jaak of Kincaid, Kan.; 12 grandchildren and nine great-grandchildren.

Remains were forwarded to Bassano by the Gem District funeral director from the local Presbyterian Church this afternoon. Mr. Laine Pastor, officiated at the service. Interment was made in the Bassano Cemetery.

## For Young Farm Folks...

**H**E pioneer farmers of the Prairie Provinces were mostly men of energy, courage and perspicacity. They soon discovered that an Oligarchy of Wealth was being built up in the grain handling and selling business. Conditions became intolerable to freedom-loving people.

The pioneers offset the encroaching money control by building their own co-operative organizations. It took much of their time, their meagre savings and vast energy to accomplish the task. But their persistence was unbeatable.

Huge grain organizations from the United States, with vast assets of wealth behind them, invaded Western Canada. Many were formed in Canada, buttressed by millions of dollars. But the Pioneer Co-operators met them all—dauntless and unafraid.

You are protected in all your grain dealings today because of the deeds of the Pioneer Co-operators. They drew up a timeless Magna Charta for the benefit of all posterity on the prairies.

The Torch is now in your hands. It is your duty and privilege to see that the co-operative institutions, developed from the efforts of a passing generation, are strengthened and perpetuated.

## Alberta Pool Elevators

Soldiers of the active forces now training in Canada will, just as their fathers, enjoy the comforts provided by the Canadian Army Hut Service. The lines and new base hospitals, said Hon. J. C. Campbell, minister of the Interior, will be ready this week. Mr. Roche is executive chairman of the drive for funds which will open in Alberta on December 3, and continue to December 11. "The slogan is 'Everybody welcome—Everybody help' and I am sure that the people of Alberta will respond to the call," he said. "And it will be our endeavor to beat the record of the last great war. 'While the boys are hanging out the washing on the Siegfried line, we'll be hanging out the clothes on the Maginot line.'

Belief that Alberta should endeavor to hold the tourist trade in winter was expressed by Alex McD. McBain, chief of the Foreign Trade Service. Hon. J. C. Campbell, minister of the Interior, said the tourist trade was an important factor in stabilizing the Canadian economy.

U. S. trade balance.

"This tourist income will be vital, I would say."

"They should be attracted here to see the marvelously beautiful Rockies, over which I have just flown."

Expectations that over 100 Alberta entries would be sent to the Chicago International Hay and Grain Show was expressed by the agriculturalists over here since.

Surviving the late Mr. Miller are his widow, Emma, two sons, Perry in San Francisco, and William Pollock of Gem; two daughters, Mrs. S. C. Royton of Payette, Idaho, and Mrs. L. E. Radford of Gem; a son, Lester, and N. E. Van Jaak of Kincaid, Kan.; 12 grandchildren and nine great-grandchildren.

Remains were forwarded to Bassano by the Gem District funeral director from the local Presbyterian Church this afternoon. Mr. Laine Pastor, officiated at the service. Interment was made in the Bassano Cemetery.

The operating earnings of Alberta Pool Elevators for the year ended July 31st, 1939, showed a surplus of \$508,067.13. This figure was arrived at after allowing \$519,651.17 for depreciation and paying \$14,583.83 to Alberta Government as interest on indebtedness. The result for the crop year 1938-1939 is the best since the year 1928-29.

Total handleings of Alberta Pool Elevators for the year under review were 405,000,000 bushels of grain, compared with 229,627,712 bushels a year previous.

The larger handleings were accounted for principally by the better crop in Alberta in 1938 as compared with 1937.

The net free assets representing the equity of the Alberta Pool Elevators, Alberta Wheat Pool as at July 31st, 1939, totalled \$4,983,783.54, an increase of \$1,045,394.04 over the previous year.

Alberta Pool Elevators operated

421 country elevators in 1938-39 out of a total of 423, and 10 terminals were operated, namely terminal No. 1, owned by the association, and Pool No. 2, leased from the Federal government. Both these terminals are located in Vancouver.

The extensive patronage given Alberta Pool Elevators by the thousands of Alberta grain producers over the past eight years has resulted in the organization making satisfactory progress in re-establishing itself financially.

Each passing year sees Alberta Pool Elevators in better shape to render efficient service to the farm people and to advance the cause of Alberta agriculture.

Long rolling trains of hand Golden Grain—each box was bound—food for the peoples of Europe, Asia and America, justifying Alberta's claim to be "The World's Greatest Heritage."

World's greatest producer of Western grains are

MONOGRAM GIN and MONOGRAM RYE aged to mature perfection.

Capt. W. (Scoty) McLennan of Calgary, spent the weekend visiting with his family in Bassano.

Mr. Ted Stiles of Bassano had a visit from his son.

Members of the local R. C. Altar Society met on Monday last, and filled grabs for the grab box at the Sale on December 9th.

A number of local citizens motored to Gleichen last Friday night to take in the Old Timers dance.

**THE CAREFUL DRIVER**

The Alberta Safety League says: "In driving in congested city traffic the main thing is to be essentially alert so that the other drivers will not be in any trouble, and so that we do not make mistakes ourselves. Careful drivers always allow themselves an extra margin of safety in both space and time. They point out that drivers should close to the car ahead, taking advantage of the time it takes to stop, and may even drop back a little so that in case the fellow in front of you stops suddenly we avoid the necessity of doing the same or of turning out to avoid running into him."

Many drivers dash across town at speeds that not only endanger themselves but others. By driving carefully and still allowing ourselves a little more time to get there safely, many quick trips can be made. Many drivers and passengers prefer to stop or turn by getting into the right position or the right traffic lane at least two blocks ahead. By doing so they avoid a lot of trouble and prevent delays for themselves and others.
